

to whom it may concern: as a paid subscriber to XM Sat. radio and a professional truck driver, I love , need , and enjoy XM radio. Not only is XM radio a safety tool, (in more ways than one) and an entertainment tool. XM is a safety tool to plan my trips in advance and when I'm in motion coming into a big city. Plus I'm not hunting for stations that may or may not tell me the info I need, keeping my eyes and hands on the wheel and paying attention to the traffic conditions around me. entertaining to keep me alert and comfortable while I'm driving. XM Radio is a tool. Keep XM Radio programming strong and growing by keeping the news, weather, and traffic channels. Brent Shaw
